Im Loffey

As you may recall, the DCS about September asked for a briefing on how space is managed. We worked up a briefing in some detail but never had an opportunity to present it as the DCS was heavily involved in other matters. Also a number of other space developments occurred which tended to obviate the need for this briefing.

Attached are some reference cards I planned to use. +
Sog. Services have a number of exhibits we selected.

I doubt that this will be raised as a requirement but you should keep this in mind.
